Information Technology

We offer a wide range of IT services from requirements definition, assessment, architectural design and secure solutions. WDS has extensive experience in all types of data center environments to provide state of the art, secure and highly available designs.

Strategy & Architecture

WDS Data Solutions provides forward thinking and innovative solutions designed for your specific environment to meet your goals.

Data Center

WDS Data Solutions can provide comprehensive assessment of any data center. Our executives are natural leaders with significant program and project management experience with history of large, complex data center migrations and consolidations.

Technology

WDS Data Solutions engineers possess industry leading technical certifications and experience. We combine the project management approach with expert level knowledge to provide complete and comprehensive solutions across a wide variety of vendor technology.

Operations & Management

WDS Data Solutions analyzes, defines, develops and delivers planned solutions that cover a wide variety of business requirements. Our leaders specialize in non-traditional solutions to ensure each customer receives a high quality and custom solution that will remain relevant into the future.

Department of Defense

WDS Data Solutions employs cleared personnel with the ability to step into any environment up to Top Secret clearance levels. We provide a variety of DoD and Federal Government services and have successfully supported mission critical programs within those communities.

WDS DATA SOLUTIONS, LLC

Certified Veteran Owned Small Business
Architecture Design Implementation

CAPABILITIES STATEMENT

WDS Data Solutions specializes in providing state of the art solutions to solve our customers unique and hardest challenges. Our team of subject matter experts combines skills, knowledge, innovation and years of direct experience to deliver comprehensive solutions. We have a history of proven project success on time, within budget with no unexpected downtime or loss of data. In an ever changing environment, where data and service availability are of the highest importance, you can count on us to deliver.

WDS Data Solutions offers a wide range of architectural, design and implementation solutions and support services. We specialize in data center solutions in compliance with Federal Data Center Consolidation Initiative (FDCCI) and forward thinking economic solutions for reducing operating costs. Our proven methodology from assessment to architectural design and implementation providing non-biased solutions allows our customers to realize cost savings by removal of unnecessary components.
